'Incident Commander Pro' V7 –
Beacon Tracking and Messaging

EXAMPLE

**Email Account Configuration for emailing beacon tracking and messages
to the 'Incident Commander Pro V7' Message Center**

Beacon Tracking/Messaging Devices:

DeLorme inReach SE   **DeLorme inReach**   **GeoPro Nano**   **GeoPro Messenger**

SPOT GEN3   **SPOT Messenger**   **SPOT Connect**

Gmail

Gmail / Email Setup - for Incident Commander Pro V7 - Message Center:

Website: https://mail.google.com/mail/
Gmail email address is: myteammessages@gmail.com

Primary Username is: myteammessages@gmail.com
Password: myteampassword

Gmail Settings:
Forwarding and POP/IMAP...
IMAP Access: Enable IMAP

Tip: Be sure to configure your Gmail or email account to NOT SPAM for:
inReach Tracking   noreply@geoprosolutions.com
GeoPro Tracking   noreply@geoprosolutions.com
SPOT Tracking   noreply@findmespot.com
SAR Technology Tracking   sarbeacons@gmail.com

*- or most of your tracking/message emails may be diverted to your Gmail/email SPAM folder,
 instead of being sent to the 'Incident Commander Pro' Message Center.*

*If tracking messages are sent to the Gmail SPAM folder, select the messages and then click the
Not Spam button to return the messages to the Gmail Inbox.*

'Incident Commander Pro V7' - GIS - Beacon Setup:

 DeLorme inReach SE   DeLorme inReach   GeoPro Nano   GeoPro Messsenger

Beacon Name: **TEAM1** or **JOHN BROWN** (with no special characters)
'Receive-From' Email Address: noreply@geoprosolutions.com

 SPOT GEN3   'SPOT Messenger'   'SPOT Connect'

Beacon Name: **TEAM1** (with no special characters)
'Receive-From' Email Address: noreply@findmespot.com

Host Computer Email Account Setup:
Create the Message Center email account (e.g. myteammessages@gmail.com) on the host computer
using an email program, such as Microsoft Outlook, or create the account directly through Control
Panel.. Mail... E-Mail Accounts.

Select Control Panel... Mail... E-Mail Accounts... New... then enter the details
of the Message Center email account. Once the account details have been entered test
the account using Test Account Settings, to confirm that the account can both receive
and send emails.

'Incident Commander Pro' Message Center Setup:
Example Email Settings:
Incoming Mail Server: imap.gmail.com   Port 993   Use SSL   IMAP option checked
Outgoing (SMTP) Server: smtp.gmail.com   Port 587   Encryption: TLS   Use authentication

Note: 'Incident Commander Pro' - GIS will make ten attempts to connect to the email sever to
retrieve the beacon emails.
If it is still unsuccessful in retrieving the email it will display an error message indicating that it
has failed to connect to the email server.
